LIBERTY JAMES

Computer Scientist | AI & Full-Stack Developer | Fintech

libertyjames200@gmail.com | +254 790 689 052 | Nairobi, Kenya

PROFESSIONAL SUMMARY

Computer scientist and software developer with hands-on experience across AI product development, financial trading systems, and full-stack web engineering. Founder of Nurish, an AI-driven wellness startup, and creator of Model Context Protocol (MCP) tooling that connects AI agents to live trading platforms including TradingView and MetaTrader. Comfortable working end-to-end — from architecting an AI engine and shipping an MVP to building automated trading tools and delivering client websites. Currently completing a Diploma in Computer Science at St Paul's University.

PROFESSIONAL EXPERIENCE

Founder & Lead Developer | Nurish 2025 – 2026

AI Wellness Startup

- Founded and led an AI-powered wellness application that delivers personalized, data-driven guidance to users.
- Architected the core AI engine, integrating large language models to generate personalized recommendations at scale.
- Owned the full product lifecycle — discovery, MVP definition, design, development, testing, launch, and iteration.
- Built and maintained the entire technology stack, from backend APIs to the user-facing application.

Algorithmic Trading Developer | Financial Trading Systems 2022 – 2026

Freelance / Contract · Remote

- Developed AI-driven financial expert advisors that automate market analysis and trade decision-making for live deployment.
- Built custom trading indicators for real-time technical analysis and signal generation.
- Created and deployed Model Context Protocol (MCP) servers for trading on TradingView and MetaTrader, letting AI agents query markets and act directly on live platforms.
- Integrated market-data feeds, order execution, and risk-management logic into reliable, production-grade trading tools.
- Backtested and optimized strategies to validate performance before live capital deployment.

Full-Stack Web Developer | Client Projects 2021 – 2026

Freelance · Remote

- Designed and developed professional websites for multiple companies, focusing on performance, usability, and scalability.
- Delivered responsive, SEO-friendly front-ends backed by robust server-side logic and databases.
- Managed each project end-to-end — requirements, design, implementation, deployment, and ongoing maintenance.

KEY PROJECTS

Nurish — AI Wellness App: Founded and led development of an AI-powered wellness platform delivering personalized health and lifestyle guidance through LLM-driven features.

AI Financial Expert Advisors: Automated advisory systems that analyze markets and generate trade decisions as reusable, deployable tools.

Custom Trading Indicators: Technical-analysis indicators built for live markets on TradingView and MetaTrader, supporting real-time signals.

MCP Trading Integrations: Model Context Protocol servers bridging AI agents with TradingView and MetaTrader for direct, programmatic trading.

Corporate Websites: Full-stack, production-grade web builds delivered for business clients.

EDUCATION

Diploma in Computer Science Expected 2027

St Paul's University

- Relevant coursework: Programming, Data Structures & Algorithms, Databases, Software Engineering, and AI/ML fundamentals.

TECHNICAL SKILLS

AI & ML: LLM integration, AI agent design, Model Context Protocol (MCP), prompt engineering, NLP, API orchestration

Programming: Python, JavaScript, TypeScript, Pine Script, MQL5, SQL, Git / GitHub, REST APIs

Fintech & Trading: Algorithmic indicators, Pine Script (TradingView), MQL5 / MetaTrader 5, expert advisors (EAs), backtesting, market-data integration

Web Development: Front-end & back-end, responsive UI/UX, relational databases, deployment, performance optimization, SEO

Product & Startup: MVP development, product strategy, rapid prototyping, technical leadership, end-to-end delivery

Tools: Git / GitHub, LLM APIs, MCP, MetaTrader 5, TradingView
